I respectfully urge you to REJECT the NAB's petition 04-160 and let them compete by embracing the concept of a FREE MARKET. The NAB should be concentrating on how they can increase the variety of programs, content, and viewpoints offered in a marketplace that is far more diverse than what their programming currently offers rather than to try and restrict another source that is offering a product/service that the marketplace is actually demanding. It is called a FREE MARKET and that is why I am glad that I can choose an alternate product/service, like satellite radio, that offers a product/service (via programming content) and range of listening-area (nation-wide) that is not currently being offered by the NAB.
